## Summary

I'm a Aspiring full-stack web developer eager to apply technical skills and learn while contributing to dynamic projects, with a strong foundation in backend and frontend technologies.

---

## Technical Skills

Languages	- JavaScript, Python, C
Backend	- NodeJS, Express.js, Django
Frontend	- HTML, CSS, ReactJS, Bootstrap
Database	- MongoDB, MySql
Tools	- Git & Github, Figma, Postman

---

## Projects

### 1. Real time Chat Application:

- Developed a website where users can send messages and communicate with other users.
- Here I used ReactJS to develop frontend and NodeJS to develop backend.
- Used MongoDB database to store users and messages.
- Implemented socket.io for real time messaging
- Github link -

### 2. Drawing tool:

- Developed a website where users can draw on the canvas.
- Here I used ReactJS and Canvas API.
- Github link -
